graph LR; A[core.anthropic_features.FilesAPIManager.delete_file] --> D[core.anthropic_features.FilesAPIManager.is_enabled]; B[core.anthropic_features.FilesAPIManager.list_files] --> D; C[core.anthropic_features.FilesAPIManager.should_upload_file] --> D; E[core.anthropic_features.FilesAPIManager.upload_file] --> D;
```

The diagram illustrates a dependency or relationship where four methods of the `FilesAPIManager` class (located under the `core.anthropic_features` namespace) all depend on or interact with the `is_enabled` property of the same class. The methods are `delete_file`, `list_files`, `should_upload_file`, and `upload_file`. Each method is represented in a white box with a black border, while the `is_enabled` property is represented in a gray box with a black border. Blue arrows point from each method box to the `is_enabled` box, indicating the direction of the relationship.
