

unittest.TestCase

```
classDiagram
    class TestCase["unittest.TestCase"]
    class TestEdgeCases["test_minifier.TestEdgeCases"]
    TestEdgeCases --|> TestCase
```

The diagram shows a class hierarchy. At the top is the 'unittest.TestCase' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. A blue arrow with an open triangular head points from the 'test_minifier.TestEdgeCases' class box to the 'unittest.TestCase' class box, indicating inheritance.
