

unittest.TestCase

```
classDiagram
    class unittest_TestCase["unittest.TestCase"]
    class test_minifier_TestAsmMinification["test_minifier.TestAsmMinification"]
    test_minifier_TestAsmMinification --|> unittest_TestCase
```

The diagram illustrates a class hierarchy. At the top is the 'unittest.TestCase' class, represented by a white box with a black border, divided into three horizontal sections. The bottom two sections are empty. Below it is the 'test_minifier.TestAsmMinification' class, represented by a grey box with a black border, also divided into three horizontal sections. The top section contains the class name, and the bottom two sections contain a list of methods. A blue arrow with a hollow triangular head points from the top section of the 'test_minifier.TestAsmMinification' class to the bottom section of the 'unittest.TestCase' class, indicating inheritance.

test_minifier.TestAsmMinification
