

axe.ChatSession.run

axe.ChatSession.process
_command

```
graph LR; A[axe.ChatSession.run] <--> B[axe.ChatSession.process_command];
```

The diagram illustrates a bidirectional relationship between two methods. On the left, a white rectangular box contains the text 'axe.ChatSession.run'. On the right, a gray rectangular box contains the text 'axe.ChatSession.process' followed by '_command' on a new line. Two blue arrows connect the boxes: one points from the gray box to the white box, and the other points from the white box to the gray box, indicating that both methods call each other.
