

models.metadata.get
_extended_thinking_budget

models.metadata.get
_max_output_tokens

models.metadata.supports
_extended_thinking

models.metadata.get
_model_info

```
graph LR; A[models.metadata.get_extended_thinking_budget] --> D[models.metadata.get_model_info]; B[models.metadata.get_max_output_tokens] --> D; C[models.metadata.supports_extended_thinking] --> D;
```

The diagram illustrates a relationship where three separate metadata attributes on the left point to a single, more comprehensive attribute on the right. The three attributes on the left are: 'models.metadata.get_extended_thinking_budget', 'models.metadata.get_max_output_tokens', and 'models.metadata.supports_extended_thinking'. Each of these has a blue arrow pointing towards a central gray box on the right labeled 'models.metadata.get_model_info'. This suggests that the 'model_info' attribute is a composite or summary of these three specific metadata fields.
