

core.sandbox.SandboxManager.check
_capability

core.sandbox.SandboxManager.run

core.sandbox.SandboxManager.is
_available

```
graph LR; A[core.sandbox.SandboxManager.check_capability] --> C[core.sandbox.SandboxManager.is_available]; B[core.sandbox.SandboxManager.run] --> C;
```

The diagram illustrates a dependency or relationship between three methods. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'core.sandbox.SandboxManager.check_capability' and the bottom box contains 'core.sandbox.SandboxManager.run'. On the right, a gray rectangular box contains the text 'core.sandbox.SandboxManager.is_available'. Two blue arrows originate from the right side of the top and bottom white boxes and point towards the left side of the gray box, indicating that both 'check_capability' and 'run' methods depend on or interact with the 'is_available' method.
